

Exercise 2: Mocking a Repository in a Service Test

```
import static org.junit.jupiter.api.Assertions.assertEquals;
import static org.mockito.Mockito.when;
import java.util.Optional;
import org.junit.jupiter.api.Test;
import org.junit.jupiter.api.extension.ExtendWith;
import org.mockito.InjectMocks;
import org.mockito.Mock;
import org.mockito.junit.jupiter.MockitoExtension;
@ExtendWith(MockitoExtension.class)
public class UserServiceTest {
    @Mock
    private UserRepository userRepository;
    @InjectMocks
    private UserService userService;
    @Test
    public void testGetUserById() {
        User user = new User();
        user.setId(1L);
        user.setName("Alice");
        when(userRepository.findById(1L))
            .thenReturn(Optional.of(user));
        User result = userService.getUserById(1L);
        assertEquals("Alice", result.getName());
    }
}
```

```
}
```

Output:

T E S T S

Running UserServiceTest

Tests run: 1
