
Exercise 3: Mocking a Service Dependency in an Integration Test

```
import static org.mockito.Mockito.when;

import static org.springframework.test.web.servlet.request.MockMvcRequestBuilders.get;
import static org.springframework.test.web.servlet.result.MockMvcResultMatchers.jsonPath;
import static org.springframework.test.web.servlet.result.MockMvcResultMatchers.status;

import org.junit.jupiter.api.Test;

import org.springframework.beans.factory.annotation.Autowired;
import org.springframework.boot.test.autoconfigure.web.servlet.AutoConfigureMockMvc;
import org.springframework.boot.test.context.SpringBootTest;
import org.springframework.boot.test.mock.mockito.MockBean;
import org.springframework.test.web.servlet.MockMvc;

@SpringBootTest
@AutoConfigureMockMvc
public class UserIntegrationTest {

    @Autowired
    private MockMvc mockMvc;

    @MockBean
    private UserService userService;

    @Test
    public void testGetUser() throws Exception {

        User user = new User();
        user.setId(100L);
        user.setName("Charlie");
        when(userService.getUserById(100L))
            .thenReturn(user);
        mockMvc.perform(get("/users/100"))
```

```
        .andExpect(status().isOk())
        .andExpect(jsonPath("$.id").value(100))
        .andExpect(jsonPath("$.name").value("Charlie"));
    }
}
```

Output:

[INFO] Running UserIntegrationTest

Tests run: 1

Failures: 0

Errors: 0

Skipped: 0

BUILD SUCCESS

Final Expected Maven Output

T E S T S

Running UserControllerTest

Running UserServiceTest

Running UserIntegrationTest

Tests run: 3

Failures: 0

Errors: 0

Skipped: 0

BUILD SUCCESS
